

RDX® QuikStation™ 4

Highly flexible removable disk array for automated data protection, disaster recovery and archiving.

The Tandberg Data RDX® QuikStation™ 4 is an iSCSI network-attached removable disk array designed to provide a flexible platform for data protection and off-site disaster recovery for physical or virtual SMB and SME environments as well as Hybrid-Cloud applications.

The RDX QuikStation 4 provides four integrated RDX drives. Combined with Tandberg Data's high capacity RDX removable media, the system provides online storage with unlimited offline storage capacity.

High Performing Network Storage

For maximum performance and resiliency, the unit provides two bonded Gigabit Ethernet (GbE) ports with load balancing and failover capabilities. With its groundbreaking flexibility and ease of management, the RDX QuikStation is the "Swiss Army Knife" of data protection.

Fits in various Environments

The iSCSI connectivity of RDX QuikStation enables an easy integration into physical and virtual environments and also Hybrid cloud storage architectures. Providing four RDX iSCSI targets, up to four application server can concurrently use their own removable disk storage device.

Overcome Capacity Limitations

By spanning RDX drives in the QuikStation together, the capacity limitation of one single RDX media volume can be extended, but still maintain all RDX benefits of removability and protection of customer's data.

Flexible and Simple

The RDX QuikStation is designed and manufactured by Tandberg Data to be enormously flexible while being simple to setup and manage. The onboard multi-language web-based management console provides for remote configuration, control, security, and management from a standard web browser. RDX QuikStation offers automatic software updates / maintenance via the internet.

Award-Winning Technology

The RDX QuikStation is built on the award-winning RDX® removable disk technology. The rugged RDX media needs no special care and is ideal for daily use in office environments. HDD and SSD based media can be mixed in one QuikStation according application requirements on capacity and performance. Full forward and backup compatibility between media and drives ensures unrestricted usage and investment protection during the entire lifetime. RDX WORM media are available for regulatory compliance archiving where data must not be deleted or overwritten.
